

T-BOSIET

Tropical - Basic Offshore Safety
Induction and Emergency Training
Including Travel Safely by Boat

APPROVED

Scope

The survival of an offshore worker can depend on his knowledge of what to do in an emergency and how to prevent an emergency from occurring. This course trains the worker to prevent emergencies and to respond to emergency situations, which may occur when working on an offshore installation. This course is designed for persons working on offshore installations in tropical regions. The course covers all the mandatory requirements for the issue of certificates specified in the OPITO common induction standards. The course also covers all the mandatory requirements for the issue of certificates for offshore safety.

Objectives

During the course delegates will gain a basic level of understanding and awareness of safety and emergency response procedures on offshore installations.

Duration, Content & Validity

Day 1: *Safety Induction, Fire Fighting & Self Rescue.*
Day 2: *Sea Survival, Lifeboat (TEMPSC) training, First Aid & Hypothermia.*
Day 3: *Helicopter Safety & Helicopter Underwater Escape Training (HUET), Travel Safely by Boat.*

Total Duration: Three (3) Days.

Validity: Four (4) Years.

Prerequisites

All delegates must possess a valid medical certificate.

Optional Course add-ons

T-EBS (Tropical - Emergency Breathing System)

Refresher Training

Refresher Training for this course is "Tropical Further Offshore Emergency Training" (T-FOET).

Refresher training is one (1) day in duration.
