

Tropical - Helicopter Underwater Escape Training (T-HUET) - Course Code 5195

- **Aim:**

The aim of this course is to train students to react to and to survive a helicopter ditching at sea. The training is comprised of classroom sessions on aspects of offshore helicopter operations, safety and survival equipment, procedures for ditching preparation, upright helicopter evacuation, and inverted (underwater) egress techniques. The practical aspect of the course is surface and underwater evacuation exercises conducted in the Modular Egress Training Simulator™ (METS™). The METS™ utilizes functional replicas of the emergency exits installed in the helicopters currently flying offshore in Indonesia. This gives the student realistic and 'State of the Art' training with the same type of equipment they will be functioning in a real situation.

- **Course content:**

08:00-08:15 Course Introduction
08:15-09:00 Check-in / boarding procedures
09:00-10:00 In-flight, landing, disembarking
10:00-10:30 Helicopter Safety requirements
