

T-BOSIET & TSbB

Tropical Basic Offshore Safety Induction & Emergency Training and Travel Safely by Boat

This course is developed to introduce learners to the specific safety issues and regimes relevant to offshore installations, and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopters in tropical environments.

This course can be delivered in conjunction with Rebreather Emergency Breathing System (EBS) or Shallow Water Compressed Air Emergency Breathing Systems (CA-EBS). Stand-alone T-BOSIET can also be taken as Digital Delivery (DD) with online theory & 1 day traditional practical.

General Course Objectives

The objectives of the T-BOSIET are that learners will be able to:

- Identify the generic hazards that are specific to offshore oil and gas installations, potential risks associated with those hazards, and how controls are put in place to eliminate or reduce risks.
- Identify key offshore related safety regulations and explain the basic safety management concepts.
- Demonstrate that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.
- Demonstrate sea survival and first aid techniques.
- Demonstrate that they can effectively use basic fire fighting equipment, and practise self-rescue techniques in low visibility situations, to include smoke filled areas.
- Demonstrate correct methods of boat transfer.

Course Content

- Safety Induction
- Fire Fighting & Self Rescue
- Sea Survival & Lifeboat (TEMPSC) training
- First Aid & Hypothermia
- Helicopter Safety Procedures & Helicopter Underwater Escape Training (HUET)
- Travel Safely by Boat
